LAB-8

Q:- Write a Java Program which created two threads, one thread displaying "BMS College of Engineering" once every ten seconds and another displaying "CSE" once every two seconds.

Code:-

```
class DisplayMessage extends Thread {  
    private String message;  
    private int interval;  
  
    public DisplayMessage(String message, int interval) {  
        this.message = message;  
        this.interval = interval;  
    }  
  
    public void run() {  
        while (true) {  
            try {  
                System.out.println(message);  
                Thread.sleep(interval * 1000);  
            }  
            catch (InterruptedException e) {  
            }  
        }  
    }  
}
```

Output:

BMS College of Engineering

CSE

CSE

CSE

CSE

CSE

BMS College of Engineering

CSE

CSE

CSE

CSE

CSE

~~BMS College of Engineering~~
